SITRA — YOUR AI AGENT

SITRA is an AI-based virtual assistant and business agent designed for companies. It automates customer communication, manages data, answers questions, and makes business processes more efficient.

Why is it important for companies?

- Increasing revenue (more sales and conversions)
- Shortening the sales cycle
- Reducing operational costs
- Reducing customer churn (higher LTV)
- Increasing marketing and sales ROI
- Optimizing human resources
- Automating business processes
- Strengthening data-driven decision making

NEXT SLIDE

SITRA CORP.

A broader corporate AI platform. Integrates with WhatsApp, Instagram, Facebook, Telegram, Email, Website and Widget systems. Establishes professional corporate communication, transfers data, manages conversations, executes tasks, and provides analytics and recommendations within the platform.

01

Automation of sales and lead management processes

02

Employee activity monitoring and internal process oversight

03

Execution of daily tasks through AI agents

04

Task creation and management system

05

Automatic call management and customer support with a speaking AI agent

06

AI-based recommendations and business analytics

07

Reduction of operational costs and human resource burden

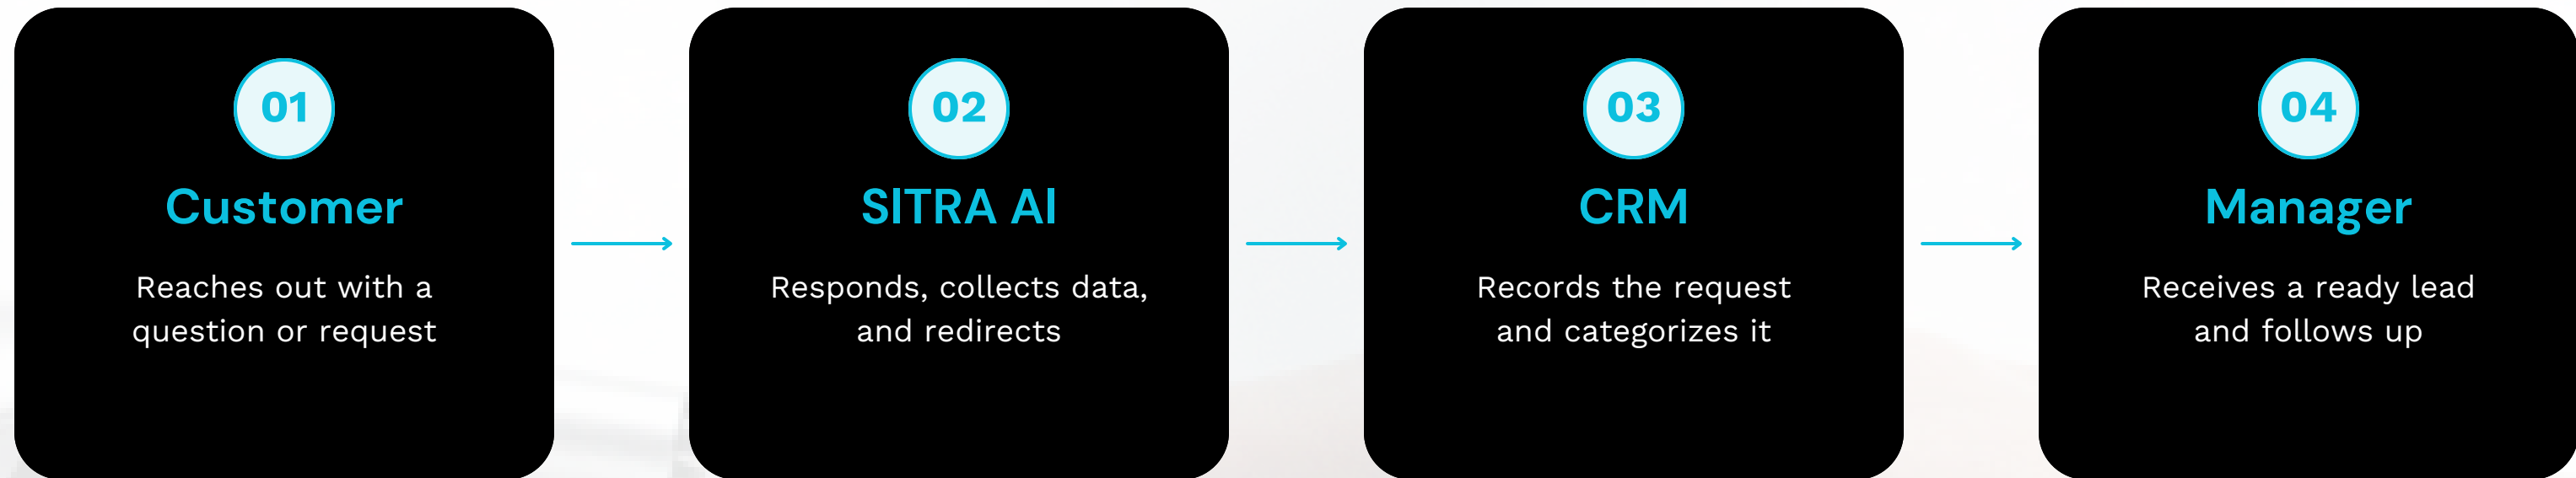

08

Integration with CRM and other business systems

How does it work?

Simple workflow

⚡ Speed

Customer inquiries are answered within seconds

🔗 Integration

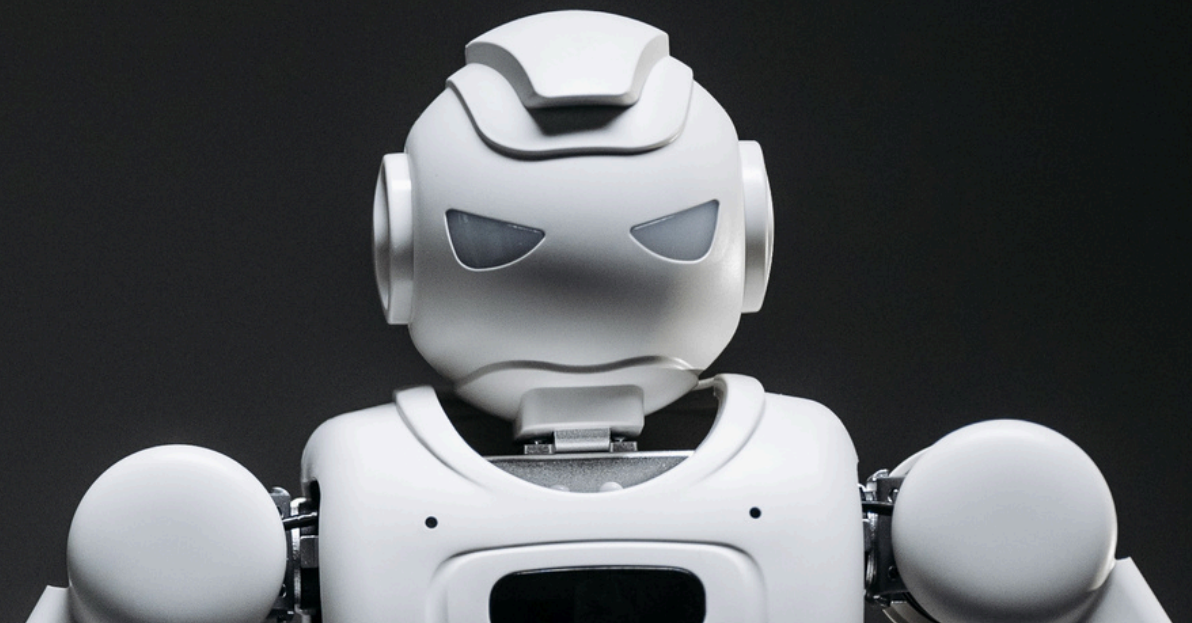

Easily connects with CRM and other business systems

💻 No code required

No technical knowledge needed for setup

Our platform helps businesses increase conversion rates by responding instantly to every customer inquiry and ensuring that no leads are lost. Companies can significantly reduce staffing costs while scaling operations without hiring additional managers.

The system is fully scalable, multilingual, and adaptable to any business needs.

How is it used?

Three use case scenarios

Sales

- 01

Consultation

Provides information about products and services to the customer
- 02

Promotion

Delivers information about campaigns and discounts
- 03

Targeted sales

Sends relevant offers based on customer behavior
- 📈 Conversion increase — up to 40%

Support

- 01

Quick response

Instantly answers frequently asked questions
- 02

Problem solving

Identifies technical issues and offers solutions
- 03

Escalation

Redirects complex inquiries to a manager
- 🕒 Response time: 1 minute

Reactivation

- 01

Win-back

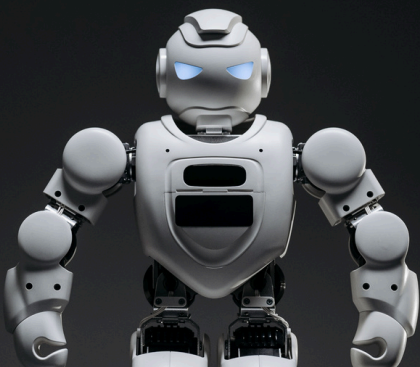

Re-engages passive customers
- 02

Reminder

Sends notifications about incomplete orders
- 03

Survey

Collects customer feedback and improves service
- ♻️ +25% reactivation

Hi, Sitra! What would you like to start with?
