ABOUT US

We have created V-SMM, a platform that makes social media management smarter.

Thanks to artificial intelligence, content creation, publishing, and ad targeting are now fully automated—in one platform, with one click.

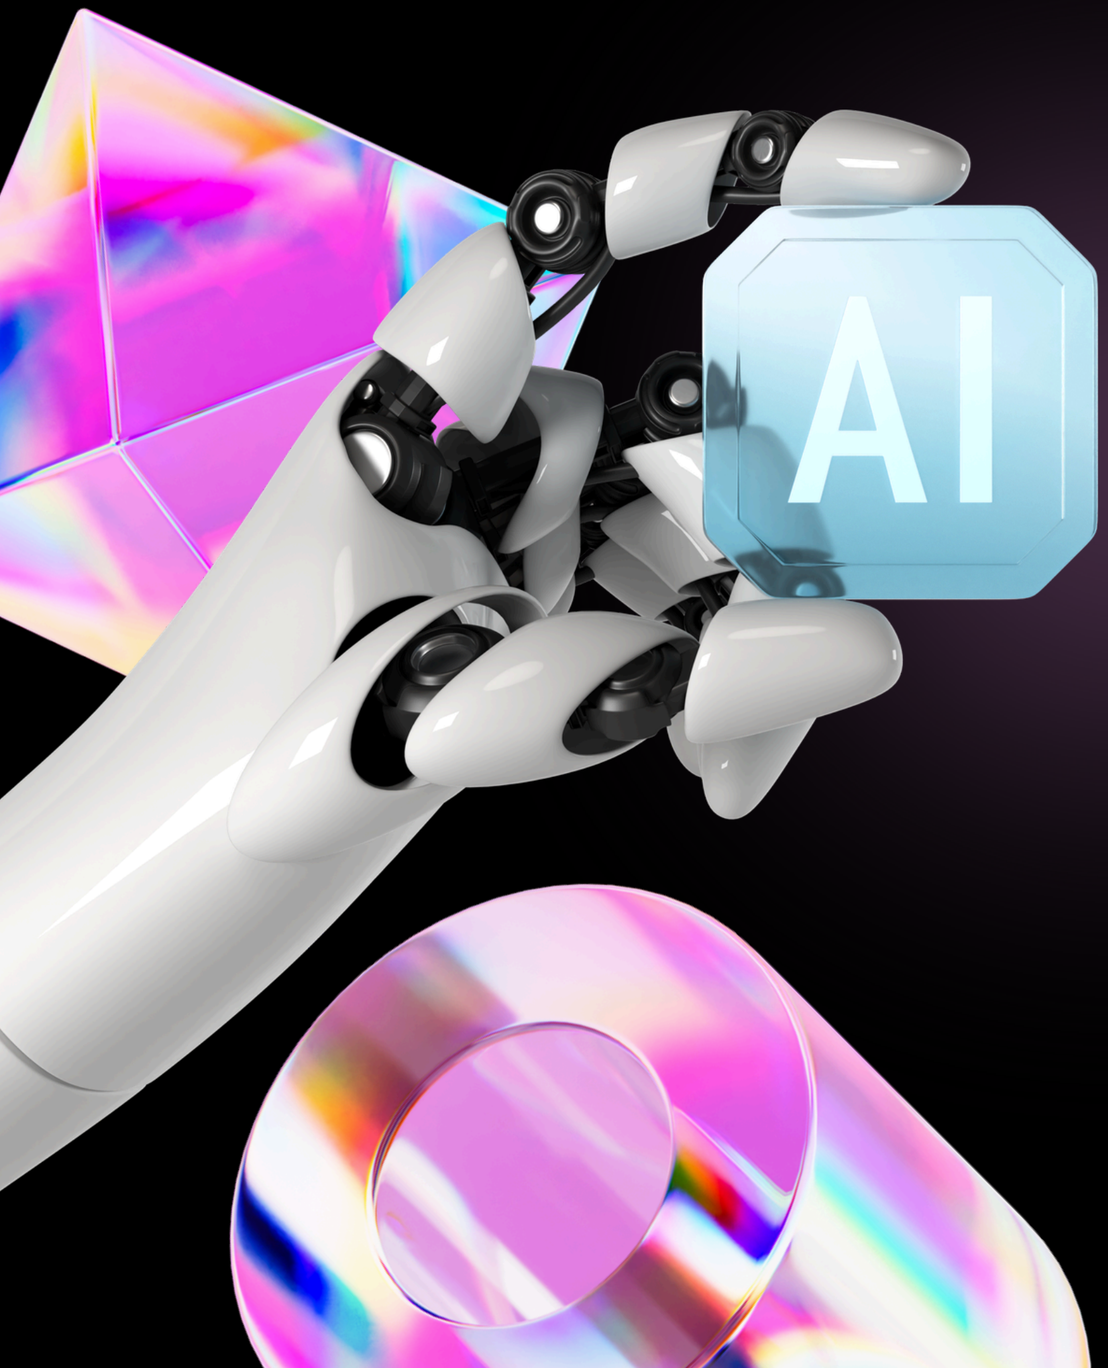

EXISTING CHALLENGES

Creating quality social media content requires time and technical knowledge.

Publishing, advertising, and targeting processes take a lot of time and resources.

Professional photo/video shoots and advertising specialists also incur additional costs.

We have fully automated this process—artificial intelligence creates and designs content based on an idea, publishes it, and optimizes advertising targets.

The user simply specifies their goal, audience, and idea.
